New incinerator for ICDDR-B - Dhaka, Bangladesh

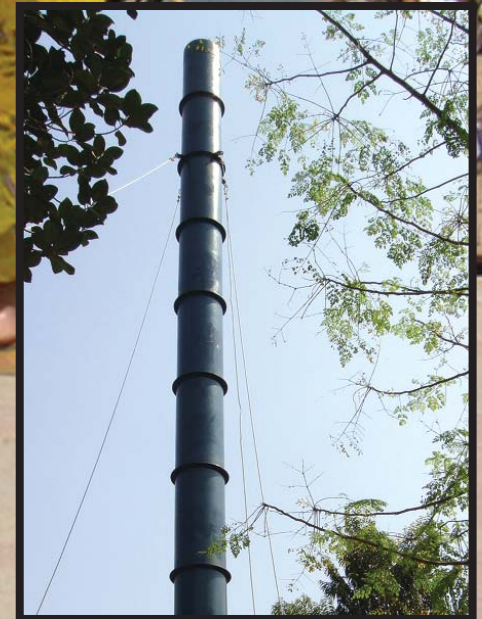

Incinco has installed and commissioned a new incinerator for the Dhaka Animal Research Branch of International Centre for Diarrhoeal Disease Research, Bangladesh (ICDDR-B). Incinco has provided incineration equipment and spares for this world renowned international charity for over 20 years.

The natural gas fired FS50 incinerator-with auto-feeding via pneumatic ram loader-was manufactured late last year and delivered early 2009. This is the second new Incinco incinerator unit ordered by ICDDR-B in 2008.

The chimney was erected by local labour and the unit was commissioned by Incinco engineers who also provided the ICDDR-B site staff with full operator training and maintenance schedules.

Incinco continue to manufacture, install and commission incineration equipment throughout the world providing our customers with unrivalled on-site service.

For more information on our range of incinerator units and other Incinco projects please contact: enquiries@incinco.com or see our website: www.incinco.com
